

# Own a Remarkable Piece of Musical History

Limited Edition Klimax System  
in Caledonian Blue

Linn Founder, Ivor Tiefenbrun, and Managing Director, Gilad Tiefenbrun, pictured at Loch Lomond with a Linn Klimax System featuring Sondek LP12, Klimax Exakt DSM in Silver Anodised finish and Klimax Exakt 350 speakers in Piano Black finish.

## Celebrating a decade of continuous innovation

---

It's been a decade since we reinvented the loudspeaker with our integrated Aktiv design, offering for the first time a stunning combination of high performance and simplicity.

Today Linn continues to be at the forefront of audio innovation with our revolutionary Exakt technology. Turning traditional hi-fi on its head, Exakt technology eliminates the sources of noise and distortion that affect all other music systems.

To celebrate, we're introducing the Limited Edition Klimax System in Caledonian Blue featuring a pair of our flagship Klimax Exakt 350 speakers and a Klimax Exakt DSM.

As a unique mark of ownership, you'll also receive a stunning Linn Falachan, machined from a solid billet of aluminium, personalised for you and exclusively signed by Linn founder, Ivor Tiefenbrun.

In addition, as a VIP owner of the Limited Edition Klimax System you'll receive a specially extended 10-year warranty.

**“Own a remarkable piece of musical history — only 10 Limited Edition Klimax Systems in Caledonian Blue available.”**

## Engineered to preserve every last musical detail

---

The Limited Edition Klimax System uses Exakt technology to preserve the integrity of the original studio recording all the way to the speakers.

By keeping the music digital until the last possible stage, Exakt enables a whole host of performance-enhancing capabilities and turns the speaker into an intelligent, connected and software-upgradeable product.

As the most advanced speaker we've ever made, the Klimax Exakt 350 is designed to produce the highest performance possible. It features a beautifully curved, ultra-low resonance cabinet, perfectly precise servo-driven bass system, Linn 3K Driver Array and 3,000 W of on-board amps.

The speakers are fed the purest digital signal by our reference Klimax Exakt DSM. Machined from a solid billet of aluminium, its clamshell design protects the delicate audio signal offering the best possible mechanical and electrical isolation for the boards inside.

**“This isn’t just the last music system you’ll ever need – it’s the last system you’ll ever want.”**

## Caledonian Blue: Made in Scotland

---

We're proud to say that every element of a Linn system is conceived, designed and made in Scotland.

In celebration of its rich Scottish heritage, the Limited Edition Klimax system has been specially finished in Caledonian Blue.

This the first time we've anodised the Klimax Exakt DSM in a custom finish; beautifully complementing the unique matte Klimax speakers.

**“Make a statement in your home with a stunning piece of Scottish engineering.”**

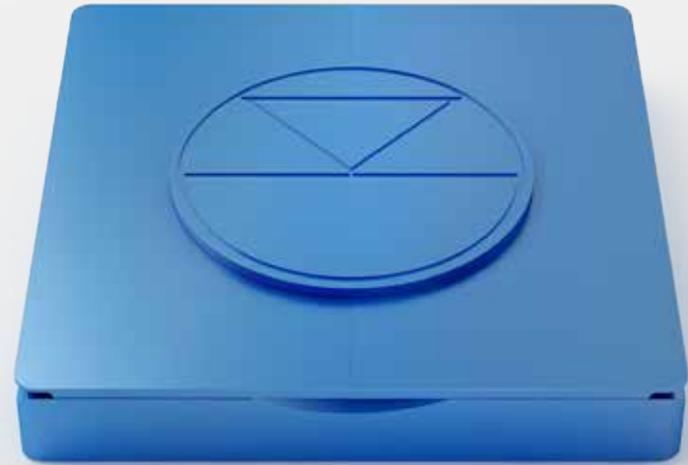

## Linn Falachan: A Proud Mark of Ownership

---

An extraordinary centrepiece for any home, the Linn Falachan is machined from a solid billet of aluminium, mirroring the beautiful clamshell design of the Klimax DSM.

Inside, the exquisite leather base is individually etched with your name and signed by Linn's founder, Ivor Tiefenbrun.

More than an exclusive collector's piece, the Linn Falachan has also been designed with ample space for your chosen Linn controller. Whether it's the latest iPad, Android tablet or Linn remote control, you'll always find it right where you left it.

# Technical Specification

## Klimax Exakt 350\*

Fully integrated Aktiv loudspeaker with built-in Exakt technology

### Crossover Type

Linn Exakt Digital

### Optimisation Technology

Linn Space Optimisation+

### Bass System

Aktiv servo-controlled
